INTERPRETATION	

SUBJECT: EPA Guidance on K061 Listing

POLICY NO. VI.1.d.

AUTHORITY KAR 31:040

INTERPRETATION OF SCOPE OF K061

The K061 waste listing is defined under 40 CFR Section 261.32 as "emission control dust/sludge from the primary production of steel (T)."

- "TI" applies to steel produced in electric furnaces, not blast furnaces.
- The listing does not include foundries.
- Facilities that use scrap steel as a raw material are included in the listing.
- The listing does not include iron making.

If a facility produces steel in an electric arc furnace using steel scrap, the emission control meets the listing of K061. What is done with the steel after this process does not affect the process wastes' including in the listing.
